Summary

Remote IT and Network Operations professional with a Ph.D. in Computer Science from Florida Institute of Technology and strong experience in system administration, network troubleshooting, endpoint monitoring, Linux server management, and technical support. Skilled in resolving incidents in SLA-driven environments, analyzing logs, supporting virtualization stacks, and delivering clear technical communication to clients and internal teams. Adept at automation with Bash, Python, and PowerShell, with a reliable history of supporting distributed systems and remote users.

Technical Skills

- Networking: TCP/IP, DNS, DHCP, VLANs, VPN, routing & switching, firewall rules.
- Systems: Linux (Debian/Ubuntu), Windows Server, remote system administration.
- NOC Monitoring: performance metrics, alert triage, event/log analysis, uptime tracking.
- Virtualization: VMware snapshots, resource allocation, VM health monitoring.
- Backup & Recovery: Synology systems, verification, logging, restore execution.
- Scripting & Automation: Bash, Python, PowerShell for administrative and monitoring tasks.
- Security: Multi-Factor Authentication (MFA), endpoint protection, vulnerability basics, policy compliance.
- Tools: SSH, RDP, command-line utilities, ticketing systems, documentation tools.

Professional Experience

- **Florida Institute of Technology — Graduate Assistant / Technical Support (2019–2021):**
 - Resolved remote support tickets for Linux, Windows, and HPC systems during COVID-19.
 - Monitored HPC cluster performance, job queues, and resource utilization on the Blue Shark system.
 - Investigated logs to diagnose network, access, and job failures.
 - Documented troubleshooting steps and created user guides for remote users.
 - Automated routine checks using Python/Bash scripts.
- **IT & Instructional Support (Volunteer Roles, 2018–2021):**
 - Provided Linux and Windows technical support for students, including remote troubleshooting and software installation.
 - Guided peers in accessing secure servers, managing SSH keys, and using distributed computing resources.

Education

- Ph.D., Computer Science — Florida Institute of Technology, Melbourne, FL (2021).
- M.S., Computer Science — University of Baghdad (2005).
- B.S., Computer Science — University of Mosul (2002).

Certifications

- Linux Server Administration — Berlin. Completed a professional course focused on Linux server management and remote system admin.
- Cisco CCNA — Certified in networking fundamentals, routing, switching, and network troubleshooting.
- IT Network Instructor (Network I) — Certified to teach foundational IT networking courses.

Additional Skills

- Strong documentation and technical communication skills.
- Experience working with MSP-style workflows.
- Comfortable interfacing with clients and distributed teams.
- Highly adaptive to new tools, platforms, and procedures.
