Summary

Computer Science professional with a Ph.D. from the Florida Institute of Technology (USA, 2021), experienced in data workflows, network operations, Linux administration, and remote technical support. Certified in Linux server administration (Berlin), Cisco CCNA, and IT Network I instruction, with extensive IT administrative and teaching experience. Skilled in monitoring network performance, troubleshooting connectivity issues, and managing Linux-based systems and servers remotely. Proficient in supporting cloud and virtualization environments, analyzing system logs, validating data integrity, and ensuring operational continuity across managed IT, cloud migration, and infrastructure support tasks. Strong programming background with practical experience applying machine learning and automation techniques to build analytical tools and solutions. Adept at technical documentation, structured problem resolution, and effective collaboration, with proven ability to contribute as a reliable team member.

Skills

TECHNICAL SKILLS

- Network Monitoring & Troubleshooting (TCP/IP, DNS, DHCP) following MSP-style workflows.
- Network Performance Diagnostics: latency, bandwidth, and device health monitoring.
- Router, Switch, and Firewall Support: VLAN configuration, interface monitoring, rules verification, and VPN setup.
- Remote System Administration for Windows & Linux servers.
- Virtualization (VMware): snapshots, resource allocation, and VM monitoring.
- Backup & Recovery: Synecology technology, verification, logging, and restore execution.
- Log & Event Analysis for anomalies, failures, and security alerts.
- Cybersecurity Essentials: endpoint protection, Multi-Factor Authentication (MFA), vulnerability awareness, and policy compliance.
- Automation Scripting: Bash, PowerShell, and Python for administrative and monitoring tasks.
- Data Handling: large datasets, reporting, asset tracking, and data validation.
- IT Documentation & Change-Control aligned with Managed Service Provider (MSP) standards.

PROFESSIONAL SKILLS

- Clear and concise technical communication for both client-facing and internal teams.
- Effective remote collaboration with distributed engineering, Network Operations Center, and IT teams.
- Strong problem-solving and customer support skills in Service Level Agreement-driven environments.
- Highly adaptable with the ability to quickly learn and apply new tools and technologies.

Languages capability

1. Arabic Language, speaking, listening, and writing.
2. English Language, speaking, listening, and writing.
3. Turkish Language, speaking and listening.

Volunteer Activities

GRADUATE STUDENT ASSISTANT (GSA) AT FLORIDA INSTITUTE OF TECHNOLOGY FROM LATE 2019 TO 2021. DURING THE COVID-19 PANDEMIC, I SUPPORTED STUDENTS REMOTELY BY ASSISTING WITH ASSIGNMENTS AND RESOLVING TECHNICAL ISSUES. IN ADDITION, I VOLUNTEERED TO HELP STUDENTS IN THE FOLLOWING AREAS:

2019 – 2021

LaTeX Workshop

Florida Tech

VOLUNTEERED TO TEACH STUDENTS HOW TO USE $\text{\LaTeX}$ FOR PROFESSIONAL AND SCIENTIFIC DOCUMENT PREPARATION.

2018

- $\text{\LaTeX}$ is a high-quality typesetting system widely used for technical and scientific documentation, enabling professional formatting and publication-ready results.

ASSISTED STUDENTS IN USING CAMPUS SERVERS, INCLUDING THE BLUE SHARK HPC CLUSTER, TO RUN COMPUTATIONAL CODES EFFICIENTLY.

2018

- The Blue Shark cluster at Florida Tech is an IBM iDataplex system with 63 compute nodes. Guided students on accessing, submitting, and managing jobs efficiently.

PAPER TITLED "COMMUNITIES OF HUMAN MIGRATION IN SOCIAL MEDIA: AN EXPERIMENT IN SOCIAL SENSING"

Feb. 2020

- In this work, we detect and relate communities of migration by analyzing discussions from social media and compare them with official immigration records. Our goal is two-fold. First, it measures the agreement between the official migration numbers and popular perception. Second, the measure of individuals' feelings from social-media data may be used by governments to guide immigration policy-making.

PAPER TITLED "A LONGITUDINAL ANALYSIS OF VOCABULARY CHANGES IN SOCIAL MEDIA"

Feb. 2020

- In this paper, we do a longitudinal analysis of the vocabulary size used in social media for 14 different cities in the USA for a period of 2010–2015. We are especially interested in the relationship between vocabulary and education attainment. We computed the size of the vocabulary for each of the cities over time and compared that to the emoji usage for the same period.

PAPER TITLED "REFUGEE AND IMMIGRATION: TWITTER AS A PROXY FOR REALITY"

May. 2018

- In this work, we investigate the role of social media and postulate whether it can be considered a proxy for the reality of international immigration. Our data analysis supports the argument that Twitter may be considered a reasonable source for information about immigration and refugee placement with the benefit that it has a real-time dimension to the information being tracking.

Achievements

Ph.D.

Melbourne, FL

UNVEILING MIGRATION PATTERNS USING DATA AND NETWORK SCIENCE

2021

- The dissertation proposed a methodology that is generic and useful to unveil the patterns of migration using data and network science. we Proposed a structure for identifying migration as a complex system. We Collected and preprocessed the data; then we constructed the networks. We used machine learning algorithms to cluster and classify the datasets.

MS

Baghdad, Iraq

SEARCH ENGINES

2005

- The thesis proposed a methodology to compare between the search engines and fine the best one among them

Bs

Mosul, Iraq

COMPUTER SCIENCE

2002

- Four years of intensive courses in computer science
